Conductive flooring

## Static electricity

Static electricity is everywhere. At its most spectacular expression appear storms and lightnings. Static Electricity is also generated by friction and separation of two materials where one is nonconductor. This produces a build-up of electric charge on the surface of each material with one becoming positively and the other becoming negatively charged.

The electrostatic charges naturally seek to balance themselves out. Electro Static Discharge (ESD) occurs as soon as contact is made with a conductive element.

Static electricity is harmless to humans. However, it can pose serious threats to sensitive equipment. Vulnerable electronic equipment can be subject to a reduction of sensitivity and even complete failure in the event of an uncontrolled discharge of static energy.

Typical concerned areas include healthcare environments such as operating theatres and intensive care wards, electronics industry and industrial clean rooms.

## ESD risks

In technical areas and industrial premises, electrostatic discharges lead to numerous problems. The most frequent among them are:

- **degradation of sensitive electronic components** leading to a loss of performance which is occasionally impossible to detect during routine quality control
- **deterioration of production conditions:** disruption of sensitive electronic equipment, aggregation of dust, reduction in line output, etc.
- **risk to human safety.**

In the electronic industry, 30-50% of faults found in components are due to uncontrolled Electro Static Discharge (ESD).

In particular circumstances, close packing of components can have a marked increase in the sensitivity of products and charges as little as 10 volts may be sufficient to increase risk.

This is most notable in restricted industrial areas where ESD can cause explosions. This may be due to the presence of flammable or explosive mixtures but also in areas where fine powders are subject to friction such as the bakery industry where fire is a permanent threat.

## Controlling ESD

To reduce the risk from static electricity, various solutions can be effective including: earthing points for people and equipment, static control packaging or ionisation, all having the intention of:

- **Limiting charges**
- **Controlling discharges**

An overall ESD risk assessment must be carried out in order to take into account the professional environment, the risks linked to procedures and the sensitivity and susceptibility of the components.

The most employed method for limiting electrostatic charge is by grounding people and objects. The use of electroconductive floorings combined with conductive footwear constitutes a key part in managing this phenomenon. It guarantees a long-term, low level and harmless discharge to people.

## Mipolam EL floorings

**Mipolam EL** floorings offer a complete range of products, **conductive (EL5)** and **dissipative (EL7)**. According to the type of requirements they ensure:

- the protection of electronic equipment and components
- the protection of people against electro-static discharge
- the protection of premises against explosive risks

Used in conjunction with conductive footwear, Mipolam EL floorings guarantee the highest level of protection against ESD risk due to their low generation of charges (< 100 to < 20 V according to the IEC 61340 - 4 - 5) and to the effective elimination of charges over long term.

# APPLICATIONS: A SOLUTION FOR ALL MARKETS

LABORATORIES - MIPOLAM EL & GTI EL5

ESD AREAS - MIPOLAM EL & GTI EL5

DATA ROOMS - DATA CENTERS -  
MIPOLAM EL & GTI EL5

AGV AREAS - GTI EL 5 ONLY

CLEANROOMS & HEALTHCARE ENVIRONMENTS -  
MIPOLAM EL & GTI EL5

# MIPOLAM EL BENEFITS

## Controlling discharges

- Mipolam EL floorcoverings guarantee the lasting elimination of electrostatic charges while taking into account people's safety.

## Low accumulation of charges

- Mipolam EL floorcoverings guarantee a low accumulation of electrostatic charges to people and equipment.

## Mechanical resistance

- The homogeneous and compact surface provides enduring resistance to static and dynamic loads.

## Chemical resistance

- Mipolam EL floorcoverings display excellent resistance to chemical products such as detergents, acids and alkaline products.

## Minimum gas emission

- Low VOC emissions ( $<10 \mu\text{g}/\text{m}^3$ ).

## Decontamination

- Mipolam EL floorcoverings are rated as “good” in compliance with the nuclear decontamination standard ISO 8690.

## Fully hygienic

- Floorcovering is non-absorbent, impervious and non-porous.
- Can be hot welded and installed with a coved skirting for easy cleaning.
- Mipolam Elegance EL5 and Mipolam Accord EL7 are treated with Evercare™ ensuring easy maintenance, no wax for life, stain barrier, chemical resistance.

## Access flooring with laminar flow

- Mipolam EL floorings and GTI EL5 tiles are especially well suited to “high-tech” applications. They are designed to be compatible with access flooring in cleanrooms with laminar flow.

## Low risk of particle contamination

- The Mipolam EL tile meets the high requirements for particle contamination set by electronic industry due to the low release of carbon particles.

# PRODUCT DESCRIPTION

## MIPOLAM ELEGANCE EL5

 2 m	$10^4 \leq Rt \leq 10^6 \Omega$	 ESD areas	 100 % recyclable	
---	---------------------------------	---	--	--

**MIPOLAM ELEGANCE EL5** is a conductive flexible homogeneous vinyl floorcovering available in sheet. The 2 mm homogeneous material incorporates carbon encapsulated granules throughout its full thickness. It has a **conductive backing** to ensure optimal and consistent conductive properties throughout its full life expectancy.

This floorcovering is treated with **Evercare™**, the latest improvements in polyurethane surface treatment obtained by UV laser cross-linking. Evercare™ avoids stain of chemical products used in healthcare like betadine, eosin or anti-bacterial hand gel and increases the durability of the flooring.

This treatment has excellent maintenance characteristics; it requires no wax for life!

**MIPOLAM ELEGANCE EL5** acts as a continuous conductive  $10^4 \leq Rt \leq 10^6$ . It has permanent antistatic properties (< 100 V). The product has to be grounded with an ESD copper strip (cf. finishes) to meet its full performance. The product is non-reactive to residual indentation with a value  $\leq 0,02$  mm EN ISO 24343-1 (EN 433).

The flooring complies with the EN ISO 10581 (EN 649) [34-43] offering a group P wear rating suitable for heavy duty traffic areas and B<sub>fl</sub>-s1 fire resistance.

The product is non-emissive of volatile organic compounds with <10 µg/m<sup>3</sup> (TVOC after 28 days ISO 16000-6).

## MIPOLAM TECHNIC EL5

 608 x 608 mm	$10^4 \leq Rt \leq 10^6 \Omega$	 ESD areas	 100 % recyclable
--	---------------------------------	---	--

**MIPOLAM TECHNIC EL5** is a conductive flexible homogeneous compacted vinyl floorcovering available in tiles.

The conductive carbon coated PVC pellets create a perfect conductive network for permanent conductive properties and antistatic properties (< 100 V) throughout its full life expectancy.

It acts as a continuous conductive  $10^4 \leq Rt \leq 10^6$  (EN 1081).

## MIPOLAM ACCORD EL7

 2 m	 608 x 608 mm	$10^6 \leq Rt \leq 10^8 \Omega$	 100 % recyclable	
---	--	---------------------------------	--	--

**MIPOLAM ACCORD EL7** is a dissipative flexible homogeneous vinyl floorcovering available in both sheet and tile form, calendered and compacted.

This floorcovering is treated with **Evercare™**, the latest improvements in polyurethane surface treatment obtained by UV laser cross-linking. Evercare™ avoids stain of chemical products used in healthcare like betadine, eosin or anti-bacterial hand gel and increases the durability of the flooring.

This treatment has excellent maintenance characteristics; it requires no wax for life!

**MIPOLAM ACCORD EL7** acts as a continuous dissipater  $10^6 \leq Rt \leq 10^8$ .

The product is non-reactive to residual indentation with a value  $\leq 0,02$  mm.

The flooring is a group P wear rating suitable for heavy duty traffic areas and B<sub>fl</sub>-s1 fire resistance.

The product is non-emissive of volatile organic compounds with <10 µg/m<sup>3</sup> (TVOC after 28 days ISO 16000-6).

## MIPOLAM ROBUST EL7

 2 m	 608 x 608 mm	$10^6 \leq Rt \leq 10^8 \Omega$	 100 % recyclable
---	--	---------------------------------	--

**Mipolam ROBUST EL7** is a dissipative flexible homogeneous vinyl floorcovering available in both sheet and tile. Calendered and compacted. It acts as a continuous dissipater  $10^6 < Rt < 10^8$  (EN 1081).

 Compact sheet without foam backing -  Compact tile without foam backing

# GTI EL5 BENEFITS

All the benefits of a GTI Tile with Evercare™ treated smooth surface and electro-conductive properties.

## ■ INTERLOCKING SYSTEM GTI EL5 CONNECT

OR

## ■ WELDED SQUARE FORMAT GTI EL5 CLEANTECH

Renovation solution

■ Easy repairs with no special tools / Easy replacement

## Direct installation

- On existing floor (concrete, ceramic, epoxy resin, pvc, ...)  
or problem subfloors (asbestos subfloor, damp subfloor, ...)

## Fast & Easy Installation

- Up to 20 sqm / 215 sq. ft. per hour

## No shut down required

- No lost revenues + Time saving

## High Traffic Resistance

- Withstands heavy loads

## Durability

- Will not crack / will not blister / will not break

## Watertight System

- Hot welding with GTI EL5 CLEANTECH

## Electro-conductive properties

- $5 \times 10^4 \leq Rt \leq 10^6$  (EN1081)  
conductive properties throughout its full life expectancy
- Low static electrical propensity:  
< 2000 V (EN1815), <100 V (IEC 61340-4-5)

## GTI EL5

 CLEANTECH 650 x 650 mm	 CONNECT 635 x 635 mm	Removable	R9	Evercare™	 100 % recyclable
--	--	-----------	----	-----------	--

### CLEANTECH

**GTI EL5 is a multi-layered looselay vinyl tile, 6 mm thick, reinforced with 2 glass fibre grids**

GTI EL5 tiles can be installed using interlocking system with dovetails (**GTI EL5 CONNECT**).

They are also available in **square format with welded joints** for clean environments and watertight systems requirements (**GTI EL5 CLEANTECH**).

GTI EL5 wearlayer is 2 mm homogeneous vinyl manufactured with continuous high pressure process, abrasion group P.

This floorcovering is treated with **Evercare™** technology: the latest improvements in polyurethane surface treatment obtained by UV laser cross-linking. Evercare™ offers **easy maintenance and resistance against stain** of chemical products used in industry and healthcare like betadine, eosin or anti-bacterial hand gel **and also bio-decontamination protocols**.

This treatment has excellent maintenance characteristics; it requires no wax for life!

The carbon encapsulated granules throughout its full thickness and the **conductive backing** and **conductive surface treatment** ensure optimal and consistent conductive properties throughout its full life expectancy.

- $5 \times 10^4 \leq Rt \leq 10^6$  according to **EN 1081**
- $Rt \leq 10^9$  according to **IEC 61340-4-1**

It has permanent antistatic properties.

- < 2000V according to EN 1815
- < 100V according to IEC 61340-4-5

**The product is non-emissive of volatile organic compounds with <math>10 \mu\text{g}/\text{m}^3</math> (TVOC after 28 days ISO 16000-6).**

Finishes: GTI EL5 ACCESS (access ramp), GTI EL5 CORNER (corner finishes), GTI EL5 CLEANTECH COVING (COVING CORNER IN and COVING CORNER OUT) and conductive welding rods (GTI EL5 CLEANTECH WELDING RODS).
