PROFIL'INOX 50 AND 30

▶ ADHESIVE-BACKED 90° CORNER PROTECTORS IN BRUSHED STAINLESS STEEL

Applications

Profil'Inox corner-strips protect 90° corners exposed to impacts. They are instantly recognisable by their rounded spine and lightly chamfered sides. They are approved for use in food-handling areas. Ideally suited for heavily used or damp areas, they are particularly useful in the food and pharmaceutical industries as well as in healthcare establishments, main kitchens.

Description

- Model: Self-adhesive corner protector
- Included angle: 90°
- Wing width: 50 or 30 mm
- Thickness: 10/10th mm
- Length: 2.50m
- Material: Stainless steel (approved for food-handling areas)
- Fixing: The corner protector comes with adhesive foam strips to be reinforced with Gerflor universal mastic glue
- Finish: Brushed metal

Typical specification

- Description: To supply and install a self-adhesive 90° corner protector with 50mm sides (such as Gerflor's Profil'Inox 50), or with 30mm sides (such as Gerflor's Profil'Inox 30), as a stainless steel profile strip with a thickness of 10/10th mm and provided with two adhesive foam strips.
- Finish: Brushed metal
- Installation method: Using adhesive strips, but reinforcement with Gerflor universal mastic glue is recommended.
